

Performed for the first time in 1955, hair transplants have greatly evolved over the years to provide the completely natural-looking results we have today. However, in order to obtain the new image you are looking for, you must work with a competent and experienced team of professionals.

## About Capilia's Hair Transplant Clinics

Our Hair Transplant Clinics are located in Ottawa, Toronto and Nova-Scotia. Be on the lookout for the imminent opening of our Montreal Clinic!

Doctors that specialize in hair transplants who have performed thousands of successful operations.

Skilled and meticulous technicians – among the best in the industry.

Advanced transplant rooms equipped with state-of-the-art instruments.

We only use the follicular unit transplant technique (F.U.T.), which is the gold standard in the industry.

## Why choose Capilia for your hair transplant?

- 1 For its team of qualified capillary experts, doctors and technicians with over 20 years of transplant experience.
- 2 For the qualifications, the competence and the experience of the surgeon and technicians, crucial to the success of the transplant. Thanks to their artistry, they will be able to create thicker hair by strategically positioning the follicular units, taking into account their size, angle and the desired density.
- 3 For its unique approach that will let you visualize, on your first visit, the final result that corresponds to your expectations, with the use of pictures.
- 4 For its concern about your physical and psychological well-being and for the cozy, calm and peaceful atmosphere that makes it easy to relax. If you are seriously considering a hair transplant, note that your surgery will be performed in one of our Capilia medical clinics;
- 5 For its unique microfollicular transplant sessions during which a maximal number of hair grafts are removed and redistributed, achieving your desired result faster.
- 6 For the service you will receive from your very first consultation up to your first hair cut after the transplant; Capilia will guide you every step of the way incorporating cabin treatments and products for home-care that promote hair regrowth and a healthy scalp.

## Microfollicular Hair Transplant Program

Contact your Capilia centre today and discover if microfollicular hair transplant is right for you - with no obligation on your part.

# STEP 1

What are your expectations?

# STEP 2

Maintaining your existing hair is also our priority.

# STEP 3

Preparing your scalp for optimal results.

# STEP 4

# STEP 5

## Before the hair transplant

### During your first visit with the Capilia Centre:

Evaluate your type of hair loss (genetic or other), your donor area and your baldness;

Understand your expectations while cross-referencing your desired look by taking into account your age, facial structure and frontal recession, and help you select the desired final result using pictures;

Establish your personalized hair transplant plan and evaluate the number of transplant sessions necessary to reach your goals;

Obtain information on the surgery, learn where on the scalp the transplant will be performed and receive your preoperative instructions;

Schedule a date for your second visit and secure your surgery date.

### During your second visit with the Capilia Centre:

Perform a complete analysis of your scalp and hair bulbs using a microcamera.

Procure the appropriate start-up package with products that correspond to your scalp condition.

### During your third visit with the Capilia Centre – 72 hours prior to your surgery:

Receive a cabin treatment that will prepare your scalp for the transplant.

## Day of hair transplant

### Surgery Day: Visit the Capilia medical clinic

Meet with the medical team prior to surgery to confirm the desired final result;

The simple and efficient surgery will be performed in a warm and inviting setting.

Obtain answers to your questions and concerns.

## After the hair transplant

### 24 hours after surgery:

You will receive a follow-up phone call from the medical team personnel.

### 48 hours after surgery

Visit your Capilia centre to receive a cleansing cabin treatment for your scalp.

### 7 to 10 days after surgery

Visit your Capilia centre to have the stitches removed and receive a cleansing cabin treatment for your scalp.

Doctor Judah, plastic surgeon specialized in microfollicular transplant for over 15 years.
